

Field Service Bulletin

To: Users of 5300 mobile radios with Astron Power Supplies

Subject: Cable change

EFJohnson has made a change to the power cabling between the Astron Power Supply and the EFJohnson 5300 mobile radio when used in desktop applications. This change was made to simplify desktop installations.

This new cable is available for order as a replacement or upgrade and will be included on all new orders shipped after April 14, 2004.

Attached is the instruction sheet for the installation of the cable.

If you have any technical questions concerning this cable or the installation of the Astron Power Supply, please contact EFJohnson Technical Support at 800-328-3911, extension 2.

To order this new cable, please contact EFJohnson Order Administration at 800-328-3911, extension ,1 and request part number 023-5300-202.
